

## Customer information - change of packaging at Feldhaus Klinker

“More sustainable packaging – the new sleeve solution at Feldhaus Klinker”

Dear customers,

we would like to inform you today about an important change in our packaging solution. **From winter 2025**, we will no longer be packaging our thin bricks and corners in cardboard boxes. Instead, we will be using a modern, automatic sleeve packaging line.

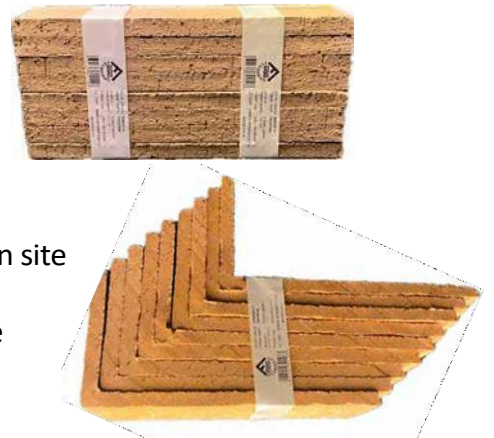

### Why this change?

The aim of this measure is clear: to **save raw materials and promote sustainability**.

- We are **reducing** paper consumption by over **380 tons per year**.
- We are **avoiding** large amounts of **packaging waste**.
- We are **creating** a simpler, more stable, and more **resource-efficient packaging solution**.

### Your advantages as a customer:

- **Less packaging material** – saves resources.
- **Less waste** – the volume of waste is drastically reduced
- **Reduced CO<sub>2</sub> emissions** – through reduced material use
- **Easy recycling** – space-saving and uncomplicated
- **Efficient handling** – faster opening, less effort on construction site
- **More transparency** – no unpacking necessary
- **Weatherproof stability** – ideal for storage, transport and use on site.

### Our claim:

Feldhaus Klinker is taking another step towards **sustainable construction** by thinking beyond the product itself. The company is making an important contribution to **resource conservation** and **environ-mental protection**, not only through its thin bricks, but also through its packaging.

Feldhaus Klinker – **the pioneer of thin bricks** and **leader for sustainability** in the brick industry.

Let's work together to create a positive future. We look forward to it!
